Subject	Collection of VFG and food waste		

Dear Sir/Madam,

There have been changes made to the municipality of Wassenaar's waste policy. We informed you earlier of the changes made with regard to the collection of PMD and residual waste. This letter is to inform you of the changes to be made in the collection of VFG waste.

Vegetable, Fruit, Garden (VFG) and food waste

Every household produces VFG waste and leftover food, which until now was thrown away with the residual waste. However, it is better to collect and process this kind of waste differently. To make this possible for you, there will be a special communal waste container at your apartment complex from 21 March onwards.

To make it easier for you to keep this type of waste separate, the municipality of Wassenaar will provide special kitchen wastebins. There are a number of distribution points where you can pick one up. Keep an eye on the *Wassenaarsche* newspaper for details. This is where you can find out on which days and at which locations you can pick up a kitchen wastebin.

Why this change?

The municipality has been tasked by the national government to reduce the amount of residual waste. VFG and food waste are heavy in weight and can be processed in a different, much better way. This is good for both the environment and the economy. By making it possible for you to keep this type of waste separate, we will make a positive contribution to the environment.

More information

If you have any questions or would like more information, please contact the municipality on telephone number 14070 or fill in the contact form at www.wassenaar.nl.

Kind regards,

Gunter Colon, coach/coordinator Groen en Wijkzaken – Ontwikkeling
b.a. Jacko van der Windt, coach/coordinator HR & Finance
